FIRM OVERVIEW

RA Consultants, LLC (RA) is a leading provider of management and technical consulting services in the infrastructure market including planning through construction services. With flexibility, creativity and today's newest technologies incorporated into every project, RA's diverse team offers practical and innovative solutions to each client. Our multifaceted team is uniquely selected to increase the value to the customer. With a variety of project disciplines comprised of seasoned professionals and young talent, our versatile company offers the skills and experience of a larger organization but with great flexibility and efficiency to ensure our client's needs are continuing to be met, thereby maximizing value with a fresh perspective and an innovative approach.

GIS

Using client geospatial data, the RA GIS team helps clients effectively use GIS tools to deliver a usable and applicable product. As an Esri Silver provider, our GIS team stays at the forefront of the latest trends and technologies in the GIS market. Our informed and educated team listens intently and is committed to helping clients successfully navigate Geospatial data. RA utilizes all Esri software and extensions for its mapping services to ensure a high-quality product every time. We map GIS data to CMMS systems and utilize data management to make more informed asset decisions.

RIGHT OF WAY EASEMENT ACQUISITION

RA staff are pre-qualified for Right of Way Acquisition Services in the areas of negotiations, closings and title research from the Ohio Department of Transportation and are experienced in the area of real property process coordination. Our projects vary through all ranges of complexities and project types. Many of these projects are required to be completed within advanced timeframes in order to maintain complicated project coordination schedules and RA has demonstrated the ability to meet project deadlines under extenuating conditions and circumstances.

FIELD SURVEYING/INSPECTION SERVICES

We perform topography surveys, including GPS structure locating and assessment. With the combination of the Electronic Total Station and GPS surveying equipment, RA has the tools to survey both accurately and efficiently. RA professionals are experienced with GIS asset inventory collection and can provide expedited sub-foot-accuracy updates to databases. In addition to land surveys, our employees in the surveying department provide field investigations, courthouse research easement/legal document preparation, and dye test investigations. We are also able to perform boundary and land title surveys, as well as construction staking.

WATER SERVICES

RA's experienced civil engineers provide water and wastewater services for a variety of municipalities and metropolitan agencies. Our services cover the water cycle, including drinking water, wastewater and storm water. From planning, survey, design, construction support and as-built documentation and startup, we are available to serve.

We have LEED certified staff, Professional Engineers and Professional Surveyors available to work with you to solve your toughest problems. We provide engineering services for below grade, at grade and above grade infrastructure.

LAND DEVELOPMENT

RA assists in the site design and development of Commercial, Residential and Institutional Sites. Our work for the client begins in the initial stages, assisting with the Planning and Zoning processes, performing survey and boundary work, as well as preparing any necessary land subdivisions. We develop design and construction plans to meet the requirements of both governing agencies and our clients and offer permitting assistance. Available construction services include staking, As-Built detention certification, sanitary and water main certifications. We also provide final Site As-Built surveys as required.

MANAGEMENT CONSULTING

Our staff performs event planning and outreach, researches the capabilities of SBE, MBE and FBE firms, registered with clients and compares to the clients future spend, estimates the labor required to construct CIP projects, and identifies gaps between capabilities of the SBE firms and the skills required by the clients CIP. We assist with project and program goal setting, marketing training, relationship building, steering committee development, internal/external communications and many other things. We perform process mapping, identify disconnects and make process improvement recommendations.
