The City of Westerville project tasks included evaluating current GIS setup and working with and assisting the GIS manager on best practices for their GIS including ArcGIS Server, ArcSDE and SQL database, and ArcGIS Online. Working with Westerville's GIS Manager RA Consultants successfully installed and deployed a new ArcGIS server instance that would be used in conjunction with CityWorks CMMS software. Additionally we created a custom silent windows installer to updated ArcGIS desktop software on over 50 machines without having to manually install on each machine.
